

Pour chaque division :

1. Compléter la table de multiplication du diviseur.
2. Effectuer la division euclidienne (quotient et reste)
3. Vérifier le résultat.

1. $6 \times 0 = \dots$ $6 \times 1 = \dots$ $6 \times 2 = \dots$ $6 \times 3 = \dots$ $6 \times 4 = \dots$ $6 \times 5 = \dots$ $6 \times 6 = \dots$ $6 \times 7 = \dots$ $6 \times 8 = \dots$ $6 \times 9 = \dots$	2. 1 3 8 6 	1. $6 \times 0 = \dots$ $6 \times 1 = \dots$ $6 \times 2 = \dots$ $6 \times 3 = \dots$ $6 \times 4 = \dots$ $6 \times 5 = \dots$ $6 \times 6 = \dots$ $6 \times 7 = \dots$ $6 \times 8 = \dots$ $6 \times 9 = \dots$	2. 9 2 7 6 	1. $7 \times 0 = \dots$ $7 \times 1 = \dots$ $7 \times 2 = \dots$ $7 \times 3 = \dots$ $7 \times 4 = \dots$ $7 \times 5 = \dots$ $7 \times 6 = \dots$ $7 \times 7 = \dots$ $7 \times 8 = \dots$ $7 \times 9 = \dots$	2. 3 5 7 7
